

## Tele Atlas to Provide Digital Map Data with Navicore for Nokia 770 Internet Tablet

Ghent, Belgium, October 19, 2006 – Tele Atlas (FSE: TA6, EUNV: TA), a leading global provider of digital maps and dynamic content for navigation and location based solutions, today announced it has been selected to provide the digital map data for the Navigation Kit for Nokia 770 Internet Tablet, which will be equipped with Navicore Personal navigation software and was launched by Navicore and Nokia this week.

Tele Atlas' digital map data is at the foundation of European GPS software provider Navicore Ltd.'s award-winning Navicore Personal GPS navigation software, which was selected for the Navigation Kit. Navicore Personal's ease-of-use and rich navigation features are optimized for the Nokia 770 Internet Tablet's high-resolution widescreen display. The tablet also features Internet access and additional content for people on the move.

"Following our recent announcement as the global digital map data supplier for the Nokia N95 multimedia computer, we're proud to extend our relationship with Nokia with the launch of the Navigation Kit for the Nokia 770 Internet Tablet and to further extend our reach in the wireless and on-line digital map markets," said Leon Van de Pas, Tele Atlas' Vice President of Regional Sales for Europe, Middle East and Africa. "Through our longstanding partnership with Navicore, we are able to provide Nokia with a unique digital navigation solution."

"With its fast mobile Internet connectivity and high-resolution widescreen display, the Nokia 770 is the perfect platform for Navicore Personal's go-anywhere GPS navigation technology," said Juha Murtopuro, CEO, Navicore Ltd. "The integration of Tele Atlas digital map data in our award-winning software, combined with the capabilities of the Nokia 770 Internet Tablet, provides a great navigation package and user experience that brings more fun and functionality to the mobile lifestyle."

### About Tele Atlas

Tele Atlas delivers the digital maps and dynamic content that power the world's most essential navigation and location-based services. The information is the foundation for a wide range of personal and in-car navigation systems, mobile and Internet map applications that help GPS system users find the people, places, products and services they need, wherever they are. Tele Atlas also works with business partners that deliver critical applications for emergency, business fleet and infrastructure services. Founded in the Netherlands in 1984, the company employs approximately 2,300 full-time staff and contract cartographers at offices in 20 countries around the world and uses a sophisticated network of professional drivers, mobile mapping vans and more than 50,000 data sources to continually update its maps. Tele Atlas is listed on the Frankfurt Stock Exchange (TA6) and on Euronext Amsterdam (TA). For more information, visit [www.teleatlas.com](http://www.teleatlas.com).

### About Navicore

Navicore is a provider of interactive navigation products for smart phones which is one of the fastest growing categories in the booming navigation market. Navicore software together with a GPS turns your smart phone into a fully functional navigator that is always with you. A smart phone based solution provides the most convenient and easiest way to navigate while driving a car, cycling or walking. Navicore products are sold in 20 countries across Europe. For more information, please visit [www.navicoretech.com](http://www.navicoretech.com).
